Vitronics Expands N. America Operations

Written by Mike Buetow Wednesday, 05 September 2012 09:19 -

HAMPTON, **NH** -- Vitronics Soltec is expanding its North American headquarters in order to accommodate a new test lab, the company said.

The expanded headquarters provides the company with almost 3,000 more sq. ft. of space that it wil use for a development and testing lab, according to Laurie Hume, Vitronics Soltec's North American business unit manager.

"We are growing and the increase in space supports our commitment to continued improvement and development on our equipment," she said in a press release.

The expanded lab initially will house a Vitronics XPM3i reflow machine, and the lab will be devoted to testing, research and development for the company's line of reflow, wave and selective soldering machines.

The company's new address is below. All phone numbers, individual extensions, and email addresses have remained the same:

Vitronics Soltec 8 Merrill Industrial Drive Unit #1 Hampton, NH 03842 Tel. +1-603-772-7778
