## **Microscan Debuts Xi Miniaturized Barcode Readers**

Written by Chelsey Drysdale Thursday, 13 December 2012 19:01 -

Xi series of miniature barcode readers are reportedly the smallest, most lightweight imagers available with embedded Ethernet. Mini Hawk Xi and MS-4Xi imagers are for almost any automation environment, with decode algorithms to read 1D/2D symbols, including DPM. Feature 10 to 30 VDC power requirements, optoisolated I/O, and RJ45 and M12 connectors, along with compatibility with M12 accessories. Include visible LED indicators. Feature X-Mode decode algorithms for reading damaged, distorted or low-contrast codes. Mini Hawk Xi includes autofocus and high-speed and high-resolution configurations.
