---

**FREMONT, CA -- OnCore Manufacturing** has opened what it calls a medical Center-of-Excellence at its facility here, complete with an IP-secure assembly area that is cleanroom ready.

The electronics manufacturing services provider will perform advanced medical device design, manufacturing and assembly in compliance with Current Good Manufacturing Practice (cGMP) regulations.

"For over 20 years the medical device market has been one of the three markets OnCore was created to serve," said Sajjad Malik, president and CEO of OnCore. "The company has continually enhanced the services offered our medical customers to address their evolving product lifecycle requirements. OnCore's Medical COE makes it easier for our customers to engage the breadth of existing and expanded services by providing a 'one-stop-shop.' "
