WASHINGTON, PA – SMG Circuits and Global Circuits merged operations to become SMG-Global Circuits

No financial terms were disclosed.

The former SMG Circuits plant will house the combined company here.

The printed circuit board manufacturers combined operations to increase capacity, consolidate resources and strengthen operations, the firms say.

SMG Circuits' Dale Sutaria will assume the position of president. Frank Padol of Global Circuits will retain his position as general manager.

Operations will continue in both locations until employees and equipment located in Oakmont are moved to the Washington location.
