SMT Resource Moves to Ex Flex Site

Written by Mike Buetow Sunday, 06 April 2008 17:31 -

WAKE FOREST, NC – SMT Resource Group has moved its technical center and warehouse into a former Flextronics manufacturing building in Youngsville.

The site provides additional space, plus room for SMT equipment restoration, testing and demos.

SMTR plans to set up two fully operational lines in a separate secure area for "time share" use by small manufacturers.

SMTR will consolidate its facilities in Temple, TX, and Wake Forest, NC, into the new site.
